

With Nano-Pro Technology the more round shaped **Bridgestone A40** does everything except off-road better than the Battle Wing. This tyre was specifically designed for optimal performance in all temperatures on the road. The front tyre has a mono-spiral belt construction that aids in ensuring sport-like handling and inspired durability. It compares with the likes of Michelin Anakee 3, Metzeler Tourance Next and Pirelli Scorpion Trail 2. Off-road wise these tyres are good for hard gravel.
