

The **Heidenhau K60** has the same design principles as the K76, with the main difference being the noticeable different tread pattern. The K60 is somewhat softer than the K76 and its V-shaped tread pattern makes it ideal for moderate sand and little mud. We found that these tyres are not too good on wet tarmac. It will give you well over 10 000kms on a set and compares with the Pirelli Scorpion MT90 A/T, Mitas E-07 and Continental TKC70.
