

The latest Enduro Street tyre from the Metzeler stable is the **Metzeler Tourance Next**. This tyre is known for what some refer to as unmatched levels of stability, grip and safety on tarmac in all weather conditions, specifically in the rain. The Next does give better mileage than the Tourance as well as providing more grip on tarmac. These tyres are ideal ideal for riders of big adventure bikes who does 90% of their riding on tarmac & 10% on hard gravel. These tyres compare with the Michelin Anakee 3, Bridgestone A40, Continental Trail Attack 2 and Pirelli Scorpion Trail 2.
