

The **Pirelli MT90 A/T** is our preferred all round tyre from the Pirelli stables. As a combination between the Scorpion Trail and Scorpion Rally, this tyre offers the best of both worlds. The same design principles are employed to offer good grip on all terrains as well as longevity. The central design offers high levels of stability and V-shape design of the tread provides excellent adherence in traction and stability. It provides good grip in all weather conditions on tarmac as well as handling hard/loose gravel, moderate amounts of sand and little mud with ease giving you mileage of around 12000-15000kms. It compares with the Continental TKC70, Heidenhau K60 and Mitas E-07.
